

## A Brief History

Dunham Products, Inc. was founded in 1946 by Joseph F. Klukan, Sr. in a small two car garage. Equipped with a thread roller and his expert mechanical skills, Klukan began producing studs for the aircraft fuel pump industry. In 1948, Joseph built the facility on Dunham Road, from which the company is named.

Joseph F. Klukan, Sr. built Dunham Products Inc. on one simple principle: give the customer more than they expect by going the extra distance to outperform their expectations. Since 1946, Dunham Products, Inc. has been persistent in delivering uncompromised quality to each and every customer.

Dunham Products, Inc. continues to be a prominent name in the fastener industry, specializing in the manufacture of aerospace and nuclear fasteners. The company also offers secondary operations such as centerless grinding, thread rolling, knurling, drilling, milling, tapping, and CNC turning. As Dunham Products Inc. continues to grow in capabilities and size, a focus on quality and a commitment to customers is the driving force behind the company.
